

The Newbies Guide To Turbo Membership

Brought to you by John Delavera and Peter Dobler

As someone looking to make a steady and reliable income online, you have most likely encountered an abundance of opportunities and membership programs promising fresh content, regular updates, and exclusive offers.

The problem with this is that these programs often leave you scrambling all over the Internet seeking out products you can promote and sell or hiring freelancers to create products on your behalf that end up costing you a fortune, while yielding very little results.

This is one of the reasons Turbo Membership was created. Not only does it offer access to a wide variety of material that you can use to create a brand all your own, but with your all-access pass, you are given comprehensive, thorough training on **exactly how to begin your online business career** with minimal cost and frustration.

By developing a system that allows you room to progress at your own pace while customizing the program so it better fits your lifestyle, you will stay motivated and on track.

There is no sense teaching a system that is so rigid that people struggle to fit it into their daily lives. **Turbo Membership is an incredibly feature-laden, yet extremely flexible, system that works the way you want it to.**

Regardless of what level of experience you have or what market you are interested in, Turbo Membership was designed to be an all-in-one business center that caters to anyone who is interested in making a lucrative income online.

The Many Faces Of Turbo Membership

Turbo Membership has been online for three years. Throughout that time, we have helped hundreds of people, just like you, start successful online careers. These are people who tried other resources, who attempted to figure it out alone, and who had struggled, some of them for years, just trying to make a living online.

The reason that we are consistently successful in helping people make progress in their dreams of financial success is because we know that people need a complete learning center. Instead of handing you bits and pieces of the puzzle, we give you everything you need to get started and to continue growing – all in one location.

As a member, you can rest assured that you are joining a program that is constantly evolving, and as the industry trends change and new resources become available, we pass this material, this knowledge, and these tools onto our subscribers so that they stay up-to-date and are able to compete within any niche market that they choose to serve.

The Turbo Membership Community Forum

As part of the Turbo Membership program, you are also given full access to our community forum. This is a powerful aspect of the membership program because, not only are you able to meet and network with other members who are involved in the same niche markets as you are or are at the same level of the learning phase as you are, but you are also able to receive personal assistance from me.

Surrounding yourself with like-minded individuals is a very important part of ensuring that you stay motivated and on track. In addition to being given access to a full support system, you can also network with others to generate new ideas, develop new products, or form joint ventures with other marketers and business professionals.

This forum is only accessible to Turbo Membership subscribers and features

additional categories that make it easy for you to post questions, share knowledge and information, and learn from others who you meet along the way.

And in the spirit of giving (which is what Turbo Membership is all about), you will also earn points for participating in the forum by posting topics, responding to existing threads, and assisting other Turbo Members whenever you can.

And to keep it fun, if ever you end up with the most points in any given month, you will be rewarded with \$97.00, which equates to one month's full access – free!

From the **“Factory of Turbo Ideas”**, a section dedicated to creating new products, to **“The Directory Of Internet Marketing Professionals”**, a section featuring a large variety of Internet Marketers who may be available for partnership, the resources contained within our forum alone will quickly become a valuable asset in your business arsenal.

Help When You Need It

We put all of the resources into place so that you are able to develop a solid business plan and take action easily by following our blueprint to success, which is completely laid out for you and designed so that even the most novice of users can understand and implement the methods and techniques that are available.

As someone who has been working online now for many years, and who was once completely new to the world of online business, I know that despite being given all of the tools, there are times where you just might need a bit of extra help.

That is why I have set up a support system that offers you a variety of options in which to receive personal assistance. As mentioned earlier, you can easily connect with other Turbo Membership subscribers via our forum, contact my team and me via email, or can request support via our integrated help desk, 24 hours a day – 7 days a week.

However, the level to which we offer support and assistance doesn't end there.

We have also developed a method of offering consistent training and updates to our entire community via the power of Live Conferences, workshops and group meetings.

We hold two conferences and one 4-6 hour hands-on workshop every month, and to ensure that we include members from different time zones, these conferences and workshops are held at two different times.

You can check for upcoming conference times by reviewing our schedule inside of the Turbo Membership Subscriber Center.

Need to actually see how to do something? We also offer 1 on 1 help in the conference room where a member of my team will walk you through each step of the process. Just contact my team and we will schedule an appointment at a time that is convenient for you.

In addition to all of the many flexible and reliable support options that are available to you, you can also reach my team via Skype for live help on specific weekdays.

As you can see, we go the extra mile in every way that we can to help you not only get started on the right path, but also to ensure that you stay focused and on track every step of the way.

From reading through this introduction to the Turbo Membership, you should have a firm understanding of all the many different elements that are available to you.

When I initially developed Turbo Membership, my objective was to build a community that encompassed everything associated to building a successful business online without forcing my subscribers to get additional providers for essential tools or services that are needed in order to make the most of your online efforts.

From beginning to end, I tackled every piece of the puzzle, from developing appealing products that I could hand over to you and know that you would be proud to sell – right down to offering you a simple, hands-free method of building a website, managing your business, and eventually expanding on your business model to include new markets, and with it, new opportunities.

My vision came to life when Turbo Marketing launched with wide reception. People who had struggled for years to build an identity online were finally able to understand the concept behind becoming successful, and by following along with me every step of the way, they were able to transform from newcomer to seasoned professional in a very short amount of time.

Most of these people are still active Turbo Members to this day because they know that there are very few places online that offer such a vast collection of resources and is led by a team that consistently works to keep the membership program fresh and ever-evolving.

If you are interested in saving time and money and you are ready to begin your journey into the world of Internet Marketing with a solid system in place, you will find Turbo Membership an essential partner in your success.
